Bringing joy to the garden

Over 700 high-quality wooden products by Palmako

Johanna 31,8 m²

Dear Customer,

We believe that a garden is much more than an outdoor area. At Palmako, it is a place to relax, connect, and enjoy life's everyday moments. In a world that often moves too fast, creating space for family, friends, and personal well-being has never been more important. That is why we are passionate about designing products that bring joy to the gardens.

Wood is at the heart of everything we do. As a renewable natural material, it offers both beauty and durability while supporting a more sustainable way of building. During its lifetime, a tree absorbs and stores significant amounts of carbon, making wood an environmentally responsible choice with a lower footprint than many alternative materials.

Palmako offers a wide range of high-quality wooden products designed to help people make the most of their outdoor space. Whether you are creating a relaxing garden retreat, a functional home office, a stylish outdoor living area, a play space for children, or a place to unwind and spend time with loved ones, our products provide solutions for every lifestyle and every garden.

A major highlight of this year's catalogue is the expansion of our Wellness collection. We have added new sauna models and significantly extended our range with hot tubs and cold plunges, creating even more opportunities to enjoy wellness in the comfort of your own garden. Whether the goal is relaxation, recovery, socialising, or daily well-being, our Wellness products help create a space where body and mind can recharge throughout the year.

We invite you to explore, dream, and create with us. Let your garden become a place of relaxation, inspiration, and unforgettable moments. Because at Palmako, we do more than create wooden products. We bring joy to the garden.

Wishing you a relaxing and enjoyable 2027!

Palmako Team

The joy of being in the garden

The garden – our connection with nature

We live our lives at crazy speeds amid droves of people and every day we become increasingly more alienated from nature. Going outdoors takes time and money and is an all around taxing experience. However, our ancient selves don't want to stop smelling the grass in the morning or seeing the light of the setting sun through tree branches. When we go back to the past along this line of heritage, we quickly reach our predecessors, who were peasants, cattle breeders or hunters. Urbanisation is a new phenomenon in human history. A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment. This feeling is deeply rooted in our subconscious and it makes the existence of a garden and time spent there so important for us.

The joy of being in the garden

We all strive to achieve ever-greater quality of life. Constantly juggling mountains of work and the need to spend time with our family forces us to look for balance between home and office, between reaping and sowing. It motivates us to emphasise our presence.

Our restless spirit and modern life force us out of our comfort zone – searching for greater value in life through social interaction and self-realisation.

Palmako doesn't build an artificial world with fake emotion and fake people. In the shape of the garden, Palmako extends quality living space, making it a special place in people's lives. Somewhere they live their real lives. A life which has meaning. Which is filled with quality time spent together, which we share with those closest to us. Somewhere we experience special moments.

We don't just make garden houses. We don't restrict ourselves to comprehensive garden solutions either.

We bring joy to the garden.

A garden is often our last direct point of contact with nature, a reminder of the unity our predecessors felt with the surrounding environment.

The many dimensions to garden life

The special moments in our lives are different and the roles gardens play in our lives are also different. A garden can be a place of relaxation where you hide from the world. Or it can be a meeting place where you discuss life with your loved ones. A garden can be the place where you devote yourself to your hobbies.

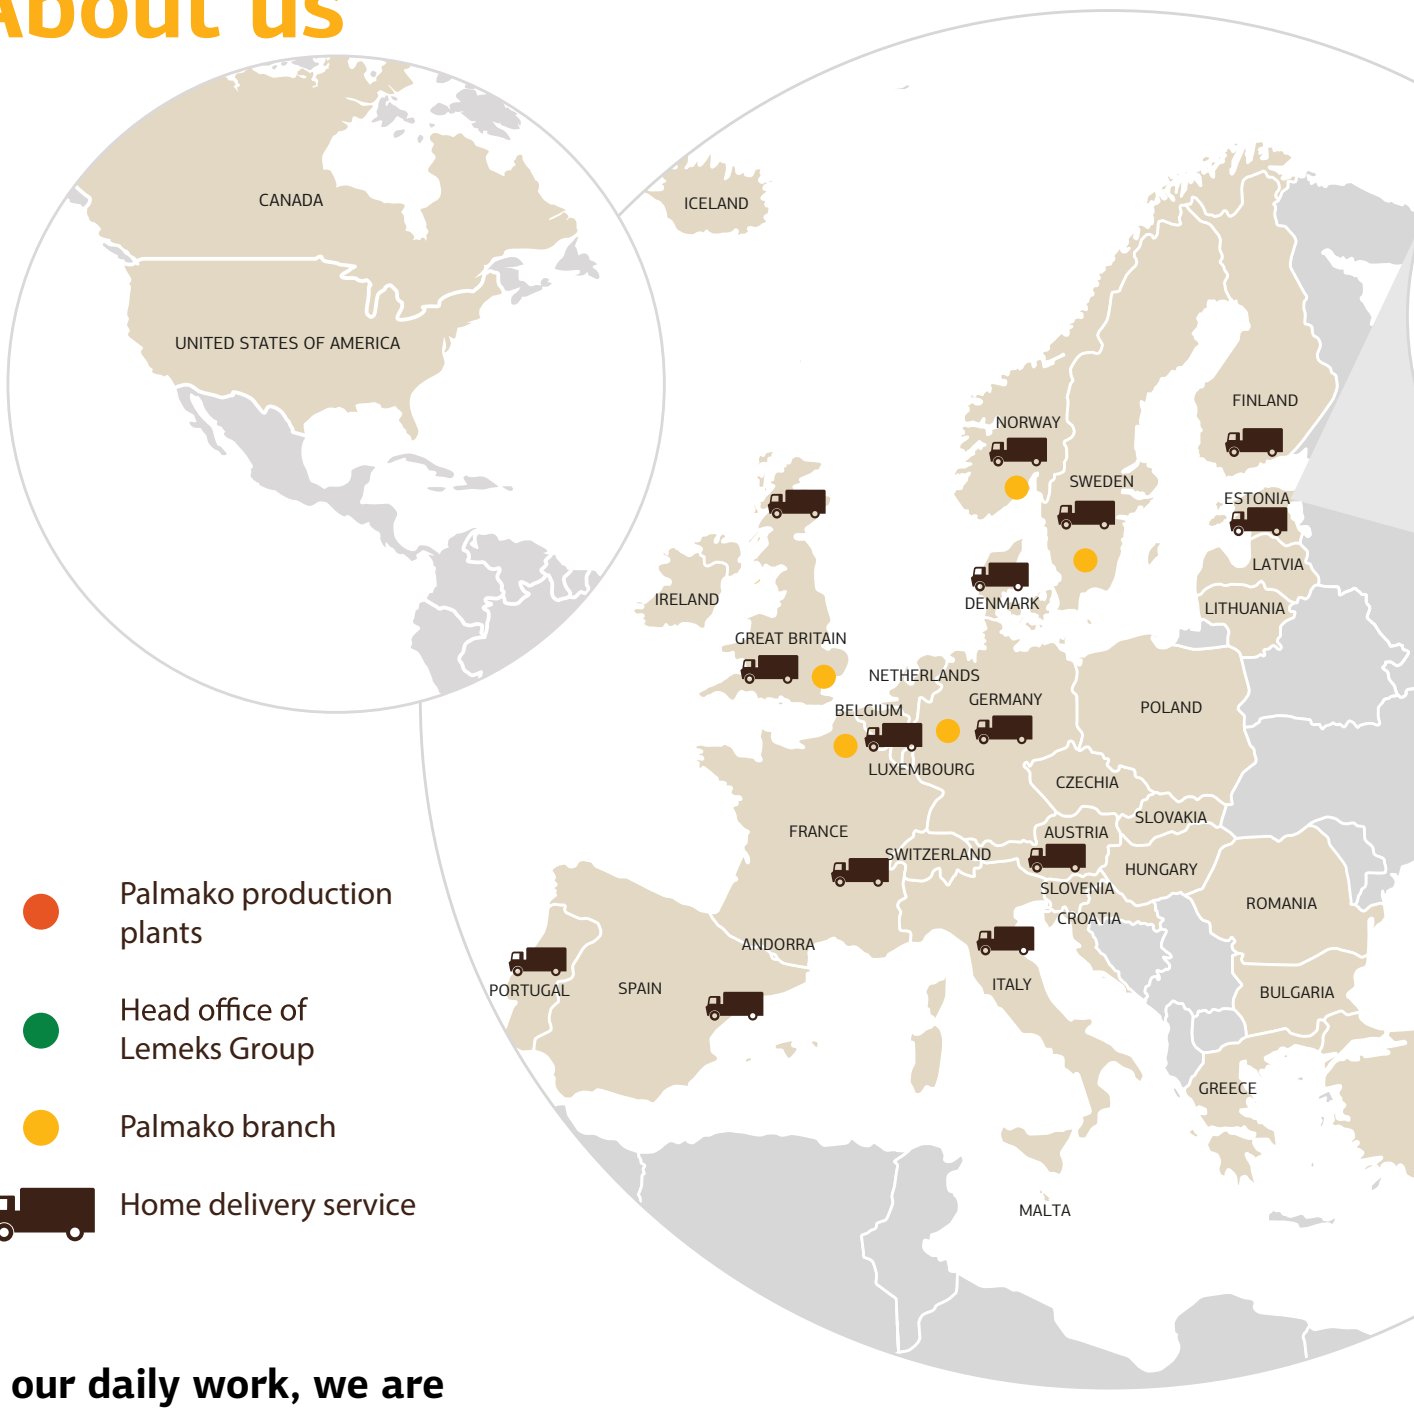

Every material has its character and soul. Wood is warm and beautiful and we understand its life cycle.

A beautiful garden can be our best feature for impressing neighbours and passers-by. It can also be a practical place for growing organic fruit and vegetables for our own use. We believe that quality time has many angles and colours, like an eventful life. We do not make decisions for garden owners; we simply do our best to turn their gardens into special places where moments are inspiring and different, just like people. The more varied our garden is the more joy it brings us.

Timeless garden wood

We have used wood to build our houses and gardens since ancient times and it has accompanied us throughout the centuries of our development. Every piece of wood has its own character and soul. Wood is warm and beautiful and we understand its life cycle. Like us, trees move in a circle of life, growing and living in the time given to them. The constantly repeating cycle makes wood a renewable resource and using resources responsibly is increasingly more important in the context of growing environmental issues. Wood produced through correct and fair management is undoubtedly one of the best choices of our time. Wood is timeless – ancient and familiar on the one hand, and a building material with a clear future on the other.

About us

In our daily work, we are guided by the following values:

- Will to win – We are results-oriented, value engaging, work challenging and act with full passion.
- Orientation to people – We are joyful, caring, and fair, valuing long-term relationships and sincere collaboration.
- Openness – We value creativity and openness to change, continuously seeking to learn and grow, welcoming considered risks.
- Dedication – We stand by our words and actions, being reliable and committed to our work, our people, and sustainable solutions.

We have invested over 50 million euros in modern, professional technology, which has enabled us to use the best machinery to make our products.

Leading manufacturer in Europe

Palmako produces and exports over 65,000 wooden houses per year, and 29 years of active operation have given us significant experience to become Northern Europe's leading manufacturer and distributor of square log garden houses.

Scan this QR-code to see a video how our products are made with utmost care!

In addition to log cabins, Palmako manufactures wide selection of garden products, glulam products and heating pellets.

Estonia is regarded as the biggest wooden house exporter in the Europe. Palmako plays a significant part in this. Our products are found in more than 40 countries around the world.

Look for FSC®
certified products.

Palmako AS offers PEFC certified products

Social responsibility

Although wood is a sustainable and regenerative natural resource, forestry requires careful and responsible management. An uncaring and irresponsible attitude towards forestry management will inevitably harm our environment significantly. We all have heard stories about the loss of some rainforests, but this concern applies equally to our Nordic forests as well. Palmako is FSC® and PEFC certified, ensuring that we use wood from responsibly managed forests. We care about the environment, which we share and in which we all live. We really do.

5-year warranty

Over the last 29 years we have produced over half a million wooden houses. We use only the latest technology to make no compromises on quality, and to make sure that the nature and its resources are handled in the best possible way. We really care about the environment that we all share. We hope that already offers a reason to trust us, but we also place a 5-year warranty on our buildings if they are treated according to recommendations. Playgrounds and swings have 2-year warranty for your complete peace of mind.

Excellent customer service

We keep stock of our re-sellers to ensure fast, precise deliveries throughout Europe, and we are ready to deliver our products directly to the end customer's if required. As a multilingual company, we can service our customers in 8 different languages – English, German, French, Spanish, Finnish, Swedish and Norwegian as well as Estonian.

Nordic spruce

Wood is an impressive, warm and living material. And nothing compares to the wonderful aroma of fresh timber. During the long, cold winters the trees grow slowly, which makes their timber especially thick and durable. You can feel it in all our products - comfortable garden and log houses, pavilions, carports, tool sheds, children's play houses, weekend and living houses, glue-laminated products, and wood pellets.

PALMAKO TINY HOUSES WITH 160 MM WALL THICKNESS

These beautifully designed modular tiny houses with terraces feature ready-made wall elements covered with wind-protection plastic on the inside, making the houses highly weatherproof and particularly resistant to rain and wind. The ready-made elements and simple construction enable fast and easy assembly.

The total element thickness of the Johanna and Rebekka houses is 160 mm. The structure is designed to accommodate up to 95 mm of insulation, providing year-round comfort in colder climates. The walls, floors, and ceilings can all be insulated. To improve ventilation within the house structure, ventilation battens have been added beneath the cladding. The element is covered with 18 mm fine-sawn cladding.

A cross section of a wall element of Johanna and Rebekka houses:

OPTIONAL PRODUCTS FOR HOT TUBS AND COLD PLUNGES

Crystal-clear water starts with the right filtration. A sand filter is essential for hot tubs to continuously remove dirt, debris, and other impurities from the water, keeping it clean and clear. Palmako sand filter kit includes a sand filter, a bag of filter sand, and a cover box made of thermally modified wood.

A great cold plunge experience starts with water at the right temperature. A water cooler is needed for cold plunges to maintain a consistently low water temperature, ensuring a refreshing and controlled cold-water experience. Palmako water cooler includes all necessary hoses and connectors for installation.

A HEATER IS THE HEART OF YOUR SAUNA

At the heart of every sauna is the heater, providing the heat and steam that define your sauna experience. Although both wood-burning and electric heaters have their advantages and drawbacks, eventually the choice of the heater is a matter of personal preference. Our saunas are developed for heating with both electric and wood-burning sauna heaters. Electric heaters heat up the sauna quickly, allow users to control the temperature precisely, and make it easy to adjust the settings as needed, while wood-burning heaters provide an authentic sauna experience with soft steam, a traditional atmosphere, and the natural ambience of a real wood fire. Please keep in mind to use a licensed electrician to complete the installation of an electric heater.

FENCE, FURNITURE & GARDENING

CREATE YOUR OWN GARDEN STORY WITH PALMAKO FENCE PANELS

If you are looking for elegant and airy fencing solutions, our range of fence panels offers the perfect way to enhance your garden, terrace, or outdoor living space. Fence panels provide an easy and stylish way to create privacy while giving your surroundings a modern and well-maintained appearance. Choose from six distinctive designs and create a layout that perfectly matches your outdoor environment. You can select a single style or combine different designs for a more personalised appearance. With durable 33 × 57 mm or 32 × 40 mm frames, our fence panels are easy to handle, long-lasting, and designed to complement any garden setting.

Depending on the model, a wide range of dimensions is available.

1800x1800 mm | 900x1800 mm | 900x1800/900 mm | 1800x900 mm | 1200x1700 mm | 1200x1000 mm | 1800x1500 mm | 900x1500 mm | 900x1500/900 mm

And depending on model one can choose between different treatments which suits the best into the garden interior:

grey pressure-treated

green pressure-treated

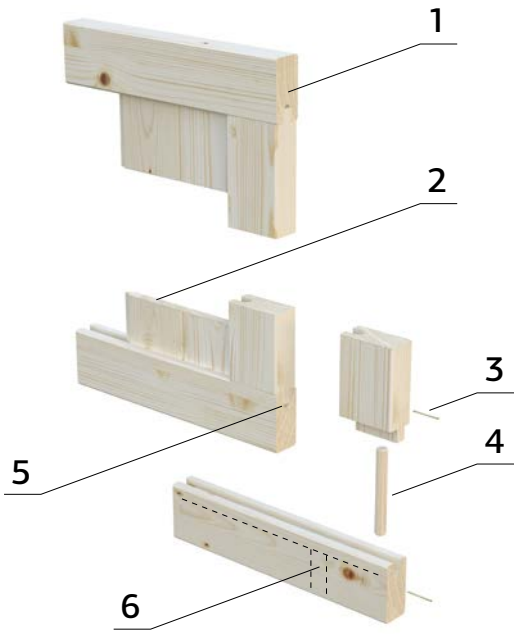

primer+white painted
2 layers (RAL 9016)

primer+grey painted
2 layers (RAL7016)

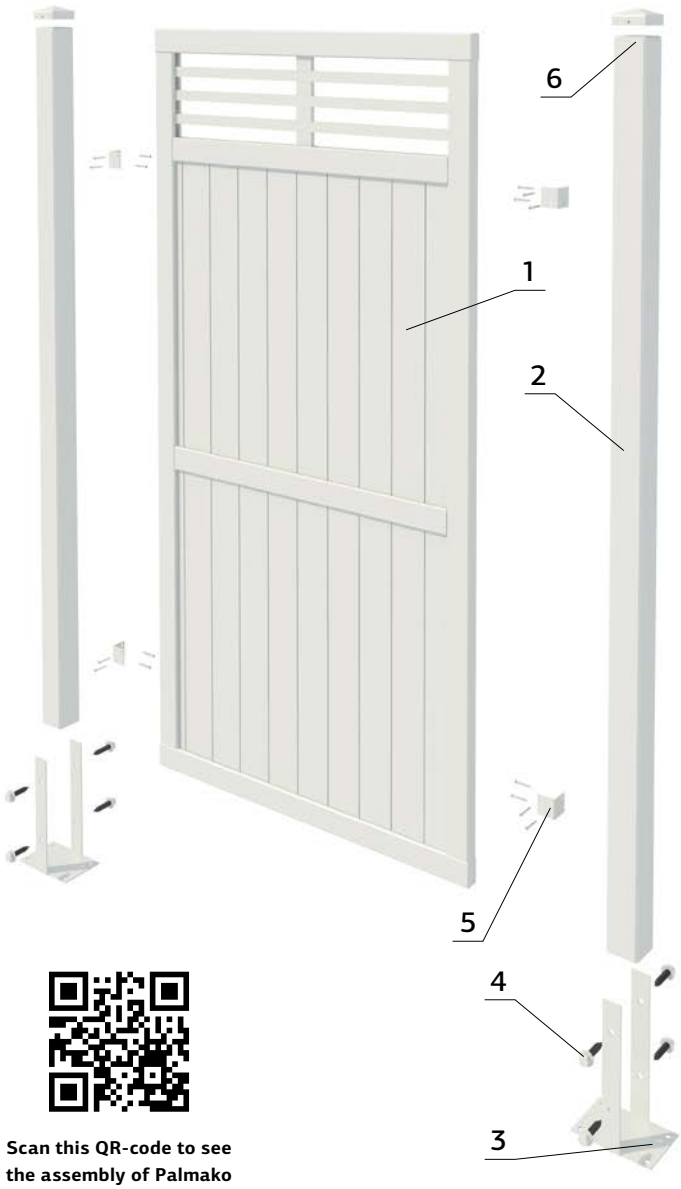

black stain 1 layer

1. Frame profile 33x57 mm
2. Board profile 12x95 mm
3. Brad nails
4. Dowel 10x130 mm
5. Water channel
6. Drainage hole to let out any built up moisture or water

All our fence panels can be easily assembled. If you look at the visual of assembling a fence panel below, you will see which products you need and how to assemble them together.

See Optional Products on p. 259 for details.

Scan this QR-code to see the assembly of Palmako Fence Panels!

1. Fence panel
2. Post
3. Post leg
4. Screws
5. L-type fastening brackets
6. Post cap

Fixings to the ground should be done properly according to the foundation. Please get appropriate fixing items from the DIY-store.

All fence panels are made of Nordic spruce which is dense, strong, durable and has small knots.

FOUNDATION FRAMES (INCL. LOGFOOT® BRACKETS)

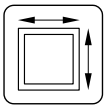

We offer our garden house customers a Foundation Kit, which includes a cut-to-size foundation frame and adjustable metal feet, known as LogFoot®. The foundation frames are pre-cut to certain fixed sizes. However, to ensure a perfect fit for your specific garden house, some final adjustments are needed to match the frame to the exact dimensions of your cabin.

FLOORS

To meet specific market demands some of our cabins are sold without a floor. Although in majority cases floor can be purchased as an optional extra. As of 2021 Palmako started to offer unified floor kits in such cases.
An unified floor kit contains of:
- 19x89x2350 mm double and tenoned needed number of floorboards
- 45x70x3000 mm brown dipped (BNDIP) needed number of foundation beams
- 19x19x2350 mm skirting boards
- 19x19 mm door strip according to the width of the door opening
  (in two sizes - for a single door and a double door) and the wall thickness.

Unified floor kits can be brown, grey or white dipped.
Due to the different size of cabins and measurements of the floors, please consider below described principle in general in cutting floorboards into the exact measure.

Double end tenoned floor board

ROOFING MATERIAL

To keep your house well protected from the weather, we offer you different types of roof covering materials - roofing felt (suitable as an underlayer), SBS roofing material, shingles or EPDM. The second one, SBS roofing material can be attached in a single layer, but it would be temporary solution and will not last as long as attached in multiple layers. It is nailed in place and bonds with the roof surface when warmed by the sun. The last, EPDM, is perfect for flat-roof models. We offer shingles in four different colours as follows - black, red, green or brown. You can buy roof covering material in full rolls/packs/ready-cut pieces.

	Article number
Roofing felt, black, 1 roll = 10 m	107210
SBS roofing material black, 1 roll = 10 m	107214
Shingles, black, 1 pack = 3 m²	107180
Shingles, red, 1 pack = 3 m²	107182
Shingles, green, 1 pack = 3 m²	107183
Shingles, brown, 1 pack = 3 m²	107181
EPDM, black, 1 roll = 1,5x10 m	111847

9 m (6+3) set for flat roof	106628 + 106626

Brown rain gutters made from plastic.

ROOF COVERING MATERIAL FOR FLAT ROOF HOUSES

Palmako offers a wide range of flat roof cabins. A question that we have always been asked is what to use as waterproof roof covering material for flat roofs? As you notice in the section of „Optional“ under each flat roof house there is a mention of special rubber roof covering material – EPDM (ethylene propylene diene monomer).

We offer **self-adhesive EPDM** with one fully adhesive side. One roll is 1,5 m wide and 10 m long.

The outer layer is made of vulcanized EPDM rubber in black colour, suitable for exposure to weather, with 400% elasticity and high impact resistance. The inner layer is fully adhesive due to the addition of a water-based dispersion adhesive, free of solvents and VOCs. This layer is protected by a white release film.

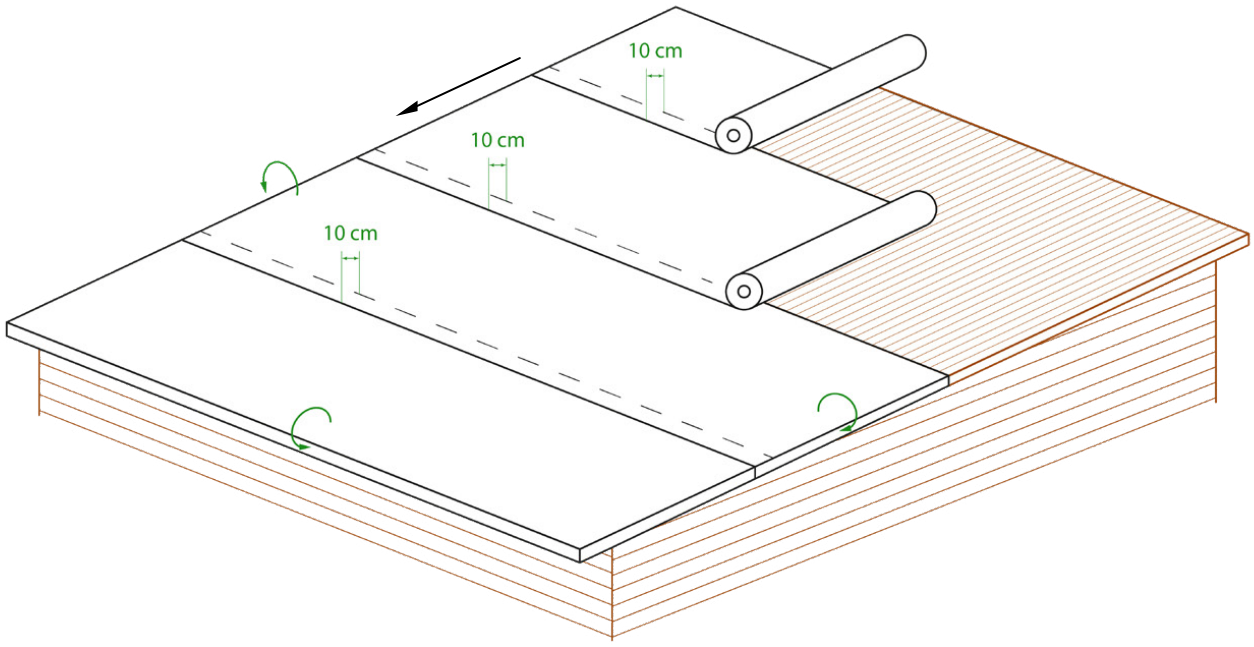

Preparation

- The support must be dry and clean, free of dust.
- There are no sharp elements, such as splinters, nail heads or protruding screws.
- There are no cutting or aggressive edges or joints between boards.

Necessary tools

- White marker
- Scissors (don’t use cutter or knifes)
- Pressure roller

The installation of EPDM is easy, just follow the installation manual enclosed with the product.

GLAZED SLIDING DOORS

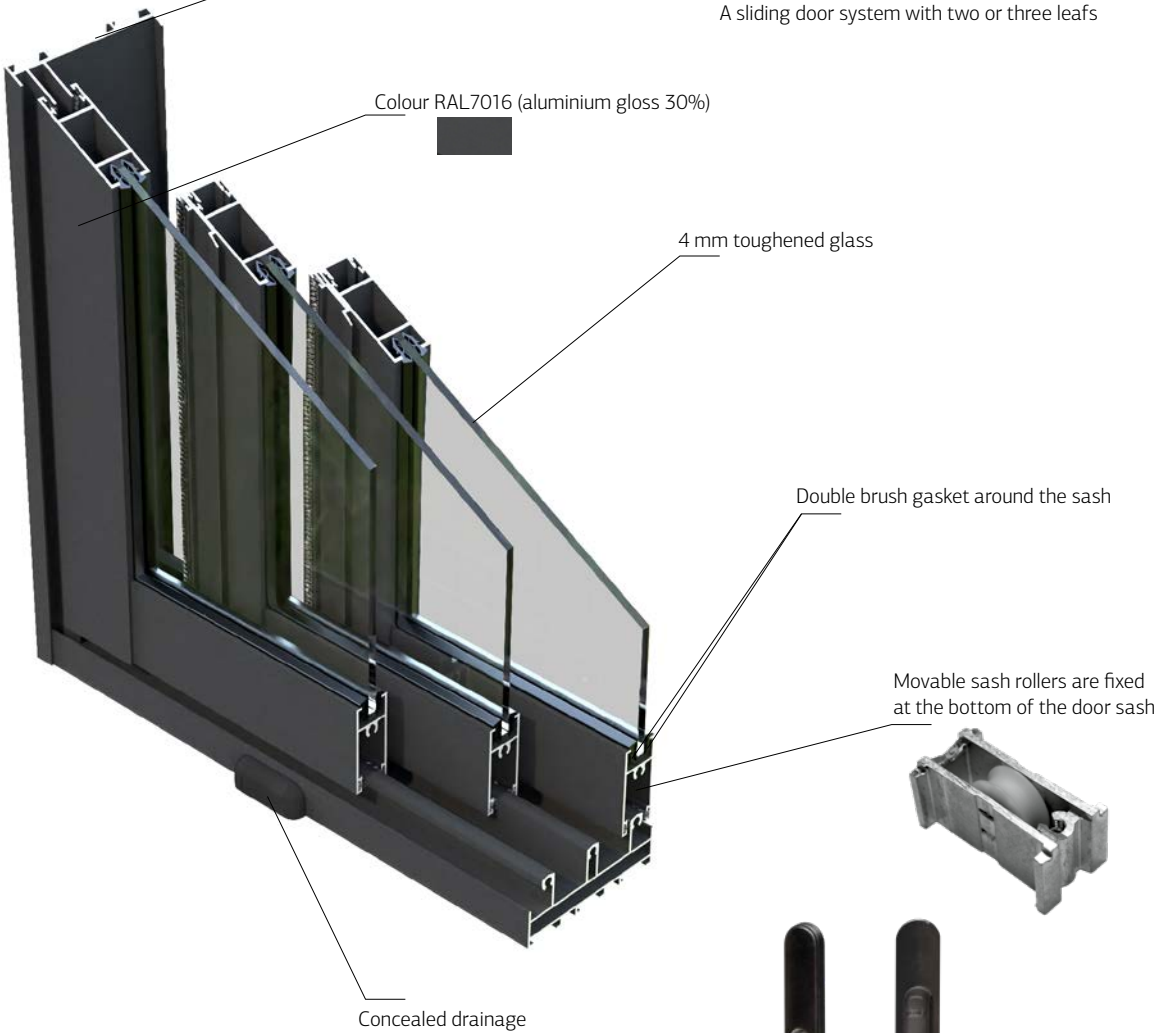

Sliding doors have become an increasingly popular feature in our product range, combining modern design with everyday practicality. Their large floor-to-ceiling glass surfaces allow plenty of natural light to enter, creating a bright and welcoming interior while offering uninterrupted views of the surrounding garden or outdoor space.

Easy to operate and space-efficient, sliding doors provide convenient access to the building and can also be used for gentle ventilation without needing to open the entrance fully. Beyond their practical benefits, sliding doors enhance the overall appearance of the building with their clean lines and contemporary look, making them a stylish addition to any garden house, pavilion, or outdoor living space.

Sliding door Slide

A sliding door system with two or three leafs

- **Without thermal insulation**
- **Door leaf security plugs**

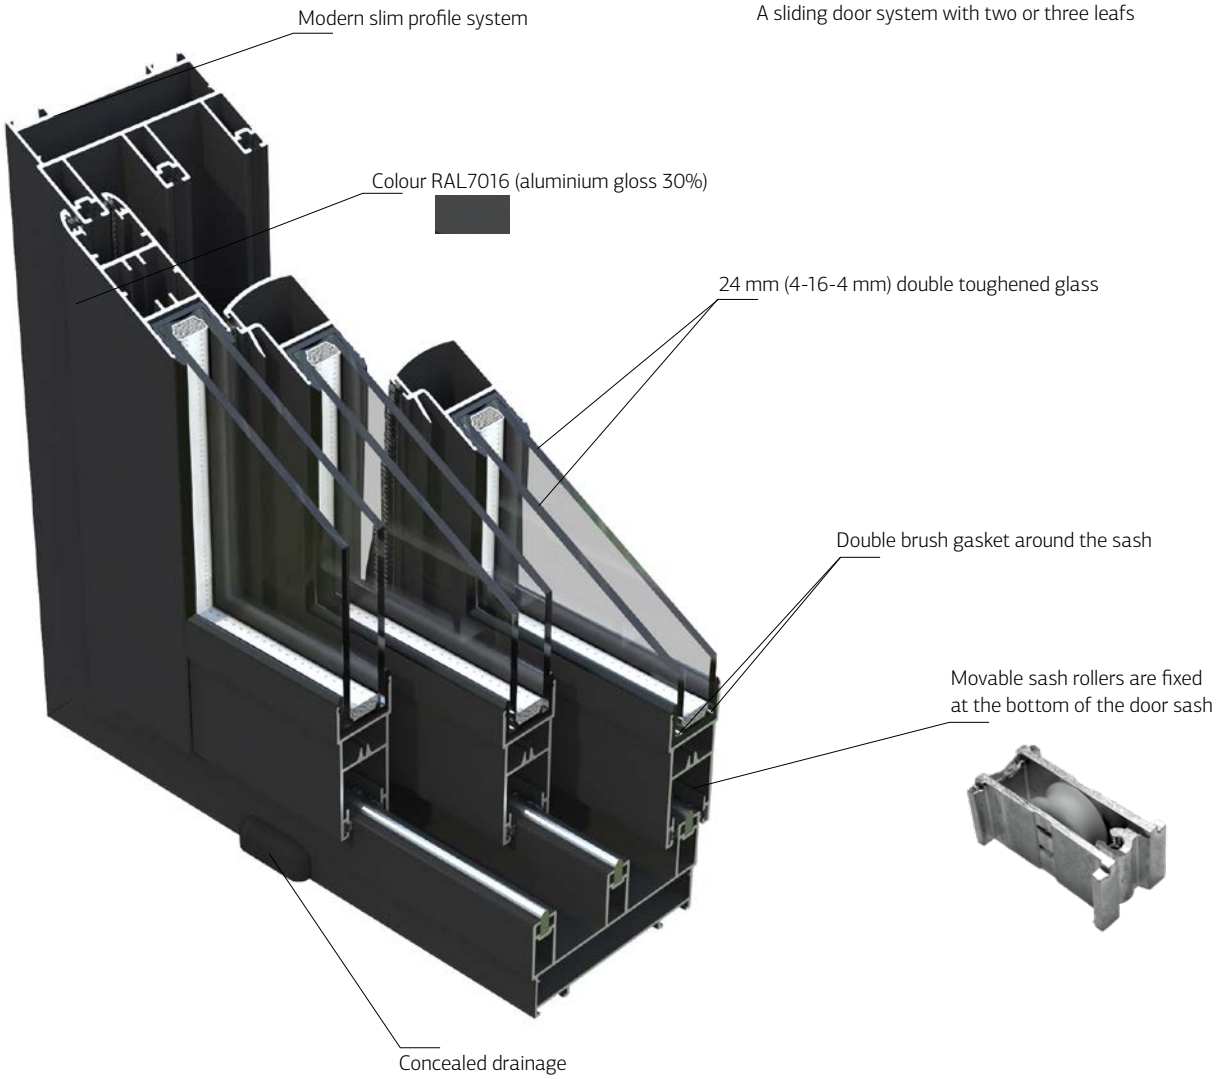

Recessed pull handle with cylinder lock

Sliding door Slide Plus

A sliding door system with two or three leafs

Surface mounted pull handle with cylinder lock

PLYWOOD DOORS

If you have built a garden house, shed or have in your garden some other ancillary building that needs a good and proper door in front of it then please get familiar with doors on this page. We have added to our windows and doors selection single and double doors made of plywood. With or without glass, just as you like the best.

Treatment as additional protection for wooden products

Production lines and machines allow us to flexibly arrange procedures and to produce a very wide product range from square log houses with different log thicknesses to the element, prefabricated and large weekend log houses. In addition to other wooden products in your garden - fence panels, terrace fences, garden furniture and other products.
Unprocessed wood becomes greyish after having been left untouched for a while and can turn blue and become moldy. Treating wood with a preservative effectively protects against wood-destroying fungi and insects, including termites. Therefore we recommend using our product treatment service. Depending on the product type we are able to treat the products in different ways.

DIPPING

As we have our own treatment baths for brown, grey and clear white dip treatment, cabins and other larger sized items can be ordered treated with Axil 3000 P by the Groupe Berkem water-soluble treatment liquid, guaranteeing treatment within classes 1–3. Dipped wood must be finished with at least two layers of topcoat. Topcoat should be applied on the dipped product as soon as possible. In case the dipped cabin is left unfinished for over six months, the wood protective properties of the dipping liquid will start decreasing.

Dipping bath for treatment

WTDIP white dip

BNDIP brown dip

GYDIP grey dip

Pressure-treated wooden details in a wood treatment autoclave

PRESSURE-TREATING

Smaller sized items like furniture can be pressure-treated in the vacuum-pressure-vacuum method giving these items a green or brown shade. Depending on model, fence panels can be grey or green pressure-treated or white or grey painted (primer plus two layers of paint). In order to extend the service life of timber we treat our products with Impralit®-KDS wood preservative. This is a water-borne, chromium-free wood preservative for the prevention of insect attacks, soft rot and fungal decay. It also offers temporary protection against blue stain and mould. Impralit®-KDS is only to be used for treating wood according to the

requirements of use classes 1, 2, 3 and 4 as stipulated in EN 335-1. For wood under cover and in the open, above ground and in ground contact, e.g. poles, fencing, playgrounds, pergolas, etc. The preservative penetrates deep into the wood with the help of vacuum and pressure. In this case a vacuum is initially generated in the cell cavities thereby evacuating the air inside them. The cavities are then filled with a preservative solution that is forced into the wood under high pressure. For vacuum pressure impregnation we work with different processes depending on the type of wood, environment and end purpose.

GYVPI grey pressure-treated

GNVPI green pressure-treated

BNVPI brown pressure-treated

PAINTING

We have invested into modern painting technology that enables us to paint smaller sized garden products like fence panels and posts. Today we are able to paint the products white or dark grey, using flowcoating method and spray chamber method. After painting, the products will dry in a 30 meter long drying chamber, where the whole process of drying can be adjusted and observed.

Painted products in drying chamber

WTPNT1+2 primer + white painted 2 layers (RAL 9016)

GYPNT1+2 primer + grey painted 2 layers (RAL 7016)

THERMO-TREATING

A major addition to the 2027 product range is our selection of wellness products made of thermo-treated wood. Thermal modification reduces moisture absorption and improves dimensional stability, helping to minimise swelling and reducing expansion and contraction in outdoor environments. It also increases biological resistance, making the wood more durable and less attractive to pests and microorganisms. Before use, protect the interior wood with a treatment specifically intended for sauna interiors. The exterior wooden surfaces must also be treated with a suitable exterior finish. To retain the original brown appearance, use a thermo wood oil suitable for exterior use.

THERMO thermally modified wood

Painting the cabins - the highest level of protection for your garden house

We have a new possibility for treating our products – depending on the product we can now paint a wide range of cabins in our product range. We value your time, you don't need to think about or paint the product from outside yourself. After assembling the house all you need to do is furnish the building and enjoy it!

Colours

Let us introduce you to our colour tone system. The combination of colours consist of the main colour and accent colour. Not all the cabins can be painted in all colour combinations, depending on a product every cabin has particular colour combinations to choose from.

An overview of all colour combinations – on the left the main colour, on the right the accent colour:

light grey + anthracite

RAL7016 + RAL7016

Palmako's brand new painting line

Paint description

We use weatherproof water-based acrylic paint for finishing wood surfaces and details. The paint forms an elastic, water and dirt repellent protective film on the surface.

Natural interior

The interior of the cabin stays natural (interior walls, floor boards and roof boards). You have a choice to cover the interior with a colourless wood impregnation agent and enjoy the beauty of natural wood or use paint, glaze or other wood protection.

No reverse installation

A wide range of our houses can be built in reverse. The wall details of painted cabins are painted only from one side, this is the reason why the painted cabin cannot installed in reverse.

Pictures are illustrative only

Please note that the visuals of the painted cabins are illustrative only and may differ from the actual finish of the product.

Sales and Warranty Terms and Conditions of painting

Please ask for the sales and warranty terms and conditions of painting from our sales team.

Palmako

LEMEKS GROUP

Bringing joy to the garden

Palmako AS is the leading manufacturer of garden and log houses, glue-laminated products and wood pellets. Our product range is wide: square log garden houses, garden cabins, garden sheds, pavilions, carports, tool sheds, children's playhouses, weekend and living houses. We also offer a wide choice of timber products in your garden – fence panels, posts and wooden furniture.

Catalogue models are kept in stock year-round for quick delivery throughout the world. Our products are well known for their quality because we use the best raw material available: durable and beautiful Nordic spruce. Palmako is FSC and PEFC certified and products made from FSC and PEFC timber have been marked accordingly.

29 years of experience in wood industry has made us one of the leading companies in this area in Europe today.
